

General Electric Healthcare to Distribute PACSHealth Software

For Immediate Release

SCOTTSDALE, Ariz./EWorldWire/Nov. 26, 2007 --- PACSHealth LLC, the developer of PACSHealth - an innovative software application that uses advanced monitoring and reporting tools to improve Picture Archiving and Communication System (PACS) workflow and throughput, today announced that General Electric Healthcare (GE Healthcare) will resell the PACSHealth software to GE's Centricity Imaging Solutions customers worldwide.

PACSHealth LLC has maintained a trusted vendor relationship with GE Healthcare and now expands its role with a new agreement that allows GE Healthcare to distribute the PACSHealth software directly to Centricity Imaging Solutions customers. The PACSHealth solution will be offered to GE Centricity PACS customers using version 2.1 and higher and may also be integrated with other components of the Centricity product family in the future. PACSHealth, LLC will continue to work together with GE Healthcare to provide installation and service support for the PACSHealth application to GE Healthcare customers.

"GE Healthcare is happy to be working with PACSHealth to help our customers improve and maintain their PACS Solutions," said Robert Mayer, GE Healthcare Imaging Solutions - Radiology Global Segment Manager. "The PACSHealth application allows our customers to monitor and address local workflow issues and provides data that a PACS System Administrator needs. It fits well within our overarching system reporting strategy where the Centricity Business Intelligence Portal provides a summarized view of the department level statistics."

PACSHealth, LLC develops software that helps improve workflow and throughput in complex medical computer systems. Learn more at '<http://www.pacshealth.com>'.

GE Healthcare offers a broad range of products and services that enable healthcare providers to better diagnose and treat cancer, heart disease, neurological diseases and other conditions earlier. Its vision for the future is to enable a new "early health" model of care focused on earlier diagnosis, pre-symptomatic disease detection and disease prevention. Headquartered in the United Kingdom, GE Healthcare is a \$17 billion unit of General Electric Company (NYSE: GE). Worldwide, GE Healthcare employs more than 46,000 people committed to serving healthcare professionals and their patients in more than 100 countries.
