

PACSHealth Ltd Joins AXREM as New Members

London, UK – June 26, 2024 – PACSHealth Ltd, a developer of medical imaging informatics software, is proud to announce its membership with AXREM, the trade association representing suppliers of diagnostic medical imaging, radiotherapy, healthcare IT, and care equipment in the UK.

Joining AXREM underscores PACSHealth Ltd's commitment to advancing the field of imaging informatics and healthcare technology and aligning with industry leaders to improve patient care through innovative solutions. This collaboration will enable PACSHealth Ltd to contribute to the collective voice of the industry, influencing key policy decisions and standards that shape the future of healthcare IT and medical imaging.

“We are delighted to become members of AXREM,” said Kaye Bonython, Managing Director UK/EMEA at PACSHealth Ltd. “This partnership reflects our dedication to driving technological advancements and ensuring the highest standards in healthcare delivery. We look forward to collaborating with other members to further our shared goal of enhancing patient outcomes through cutting-edge technology.”

“I am really pleased to welcome PACSHealth and the team to AXREM and our community, the addition to our membership compliments many other members products and broadens our representation,” said Sally Edgington, Chief Executive Officer of AXREM.

PACSHealth Ltd is excited about the opportunities this membership brings and is committed participating in AXREM's initiatives, working together with peers to address industry challenges and promote best practices.

About PACSHealth LLC

www.pacshealth.com

PACSHealth, LLC (www.pacshealth.com) is a software company that develops medical imaging technology. PACSHealth Ltd, with offices in the UK, is a division of PACSHealth LLC. PACSHealth, LLC includes the PHS Technologies Group, LLC division which develops advanced solutions that help hospitals manage patient radiation exposure and comply with regulatory requirements and industry guidelines. PACSHealth's solutions help create a safer and more efficient medical imaging environment and are installed at over 1600 hospitals worldwide.

PACSHealth LLC solutions include:

PACSHealth® – Ensure optimal performance of your Enterprise PACS

- THE solution for PACS Monitoring, Database-driven reporting and analysis, and Audit Log management
- PACS real-time system performance visibility/workflow management
- Proactive error identification

VNAHealth® – Intelligent radiology informatics to manage image workflow and data consistency

- Validate the integrity of exams as they pass from source to destination systems and provide inconsistency reports in real-time

- Deep level exam and metadata analysis to detect business logic violations and errors in real time
- Compatible with all vendors of PACS, VNAs, and any DICOM responsive devices.

DoseMonitor® – The top rated patient radiation dose management solution in the market

- Proven enterprise-wide solution with the easiest to adopt interface
- Support for all modalities (CT, XA, MG, DR, NM, PET, and now MR)
- The most advanced voxel-hybrid phantoms to calculate CT organ dose
- Peak Skin Dose calculations

DICOMeXtreme™ router - DICOM and HL7 router with built in analytics

- DICOM and HL7 router that has been implemented at some of the largest IDN's in the world, currently processing >100M exams/year.
- Fully customizable to a specific business need, DICOMeXtreme can move, morph, route and deliver all data rapidly with built-in error checking and audit management.
- AI-powered DICOM pre-fetch Engine, enhancing workflow efficiency
